EDUCATION

Bachelor of Technology in Computer Science (AI & ML) 2025 – 2029
Government Engineering College Bokaro, Jharkhand
University: Jharkhand University of Technology

Intermediate (Class XII) 2024
Gourav Awasiya Uchcha Vidyalay, Chas Bokaro
Percentage: 66% | **Board:** Central Board of Secondary Education (CBSE)

Matriculation (Class X) 2022
DAV Koriya Chandankiyari Bokaro
Percentage: 84% | **Board:** Central Board of Secondary Education (CBSE)

TECHNICAL SKILLS

Languages: C, C++, Python
Frontend: HTML, CSS, JavaScript
Tools: VS Code, PyCharm, Anaconda, GitHub
Technologies: Artificial Intelligence & Machine Learning (Basics)
Additional Knowledge: Data Structures & Algorithms (C++), Matplotlib (Python), Django (Basics)

PROJECTS

- **AI Resume Analyzer & Job Matching Platform**
  - Developed a full-stack web application that analyzes resumes and matches candidates with relevant job roles
  - Built using Django (Python) and Django REST Framework for backend API development
  - Implemented NLP techniques to extract skills, experience, and education from resumes
  - Designed a job recommendation system using TF-IDF and cosine similarity to match candidates with suitable job postings
  - Created an interactive frontend using HTML, CSS, JavaScript for resume upload, analysis results, and job recommendations
  - Implemented user authentication, resume history, and secure data handling
  - **Tech Stack:** Django, DRF, HTML, CSS, JavaScript, NLP, scikit-learn
  - **GitHub:** github.com/adityaff6299/ai-resume-analyzer
- **Expense Tracker Web Application**
  - Developed a full-stack web application to track and categorize daily expenses (food, travel, etc.)
  - Built using Django (Python) with HTML, CSS, and JavaScript
  - Implemented user authentication and data management features
  - Deployed on PythonAnywhere for real-time access
  - **Live:** adiitya.pythonanywhere.com | **GitHub:** github.com/adityaff6299/expense-tracker
- **Management System Suite (C++)**
  - Developed a collection of console-based applications for managing student records, bank transactions, and library operations
  - Features include add, update, delete, file handling, account management, book issue/return, and data persistence
  - Applied object-oriented programming concepts and modular design
- **Snake Game (C++)**
  - Developed a classic snake game with real-time controls and collision detection
  - Implemented scoring system and game logic

CERTIFICATIONS

- Python Programming Course – Udemy
- C++ Programming Internship – Theranix
- Communication Skills – TCS iON

EXTRACURRICULAR ACTIVITIES & ACHIEVEMENTS

- Technical Member, Institution's Innovation Council (IIC)
- Won Idea Pitching Competition conducted by IIC, GEC Bokaro
